

Bill Chen

Senior Software Engineer · Full-Stack & Platform

hello@billchen.dev · +1 (555) 555-0123 · Toronto, Canada · github.com/billchen247 · linkedin.com/in/billchen

SUMMARY

Senior software engineer with 9+ years of experience building highly-available web platforms and developer tooling. Comfortable across the stack — React/TypeScript on the front end, Node.js and Go services on the back end, and CI/CD, observability, and cloud infrastructure in between. Track record of shipping user-facing features to millions of users while keeping systems reliable, testable, and pleasant to work in.

TECHNICAL SKILLS

Languages	TypeScript · JavaScript · Go · Python · Java · SQL
Front End	React · Next.js · Redux Toolkit · TanStack Query · Vite · Tailwind CSS · Storybook
Back End	Node.js · Express · NestJS · Go (Gin, chi) · GraphQL · gRPC · REST
Data	PostgreSQL · Redis · DynamoDB · Elasticsearch · Kafka · dbt
Cloud & Infra	AWS (EKS, Lambda, RDS, S3) · Terraform · Docker · Kubernetes · GitHub Actions
Practices	TDD · System design · API design · Code review · Mentoring · Incident response

PROFESSIONAL EXPERIENCE

Senior Software Engineer · Meridian Software Inc. Toronto · Jun 2022 – Present

- Led the redesign of the checkout platform (React + Node); cut p95 checkout latency 62% and lifted conversion by 4.1%.
- Architected a shared component library adopted by 6 product teams; established design tokens, a11y baseline, and Storybook-driven review.
- Drove migration from Heroku to AWS EKS with zero customer downtime; wrote the Terraform modules the rest of the org now reuses.
- Mentor 3 mid-level engineers; run the internal “deep dive Fridays” series on distributed-systems fundamentals.

Software Engineer · TechFlow Systems Remote · Aug 2019 – May 2022

- Built an ingest pipeline in Go handling 2M+ events/day with p99 < 40ms; introduced backpressure and DLQ handling that removed a class of on-call incidents.
- Owned the customer-facing analytics dashboard (React + D3); shipped saved-view sharing that became the top-used feature within a quarter.
- Introduced trunk-based development and required PR review + CI checks; deploy frequency went from weekly to multiple times daily.

Junior Software Developer · Northline Digital Toronto · Jul 2017 – Jul 2019

- Full-stack feature work across a monolithic Rails app; migrated the notifications subsystem to a Node/Kafka service, cutting mail-send latency from minutes to seconds.
- Built an internal admin console (React) that replaced a spreadsheet-based workflow used daily by the ops team.

EDUCATION

M.Sc., Computer Science — University of Toronto

2021 – 2023

Specialization: Human–Computer Interaction · GPA 3.9/4.0

B.Sc. (Hons.), Software Engineering — University of Waterloo

2016 – 2020

Dean's Honour List · Capstone: real-time collaborative code editor

SELECTED PROJECTS

Insight Analytics Dashboard

Real-time internal dashboard used by 40+ teams; reduced report generation from hours to under a minute.

TrailTracker Mobile App

Offline-first hiking companion (React Native); 4.8★ on iOS & Android, 15k+ downloads Q1.

OrderFlow API Platform

Node/Express service handling 2M+ orders/day; cut p95 latency 62% through query & cache redesign.

OSS: react-portfolio-site

A Vite + React starter for personal portfolios with dual Netlify / GitHub Pages deploys.

CERTIFICATIONS

AWS Certified Developer — Associate (2024) · Certified Kubernetes Application Developer (CKAD, 2023)
